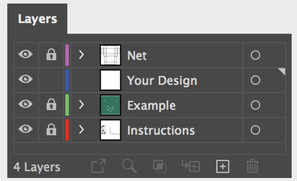
postal box

Step-by-Step

1. Please get familiar with our tips and layer system listed below.
2. Please place your artwork on the ‘Your Design’ layer. Hide the Bundle ‘Example’ layer by clicking the eye.
3. We would recommend to export your file as a standard Adobe PDF/X-1a2001 standard.
4. Once complete, upload your PDF to our website in the checkout.



Process

Four Colour
As our boxes are digitally printed, use any CMYK combination. We don’t use Pantone colours.

Outlines
Convert all type to outlines before exporting your artwork.

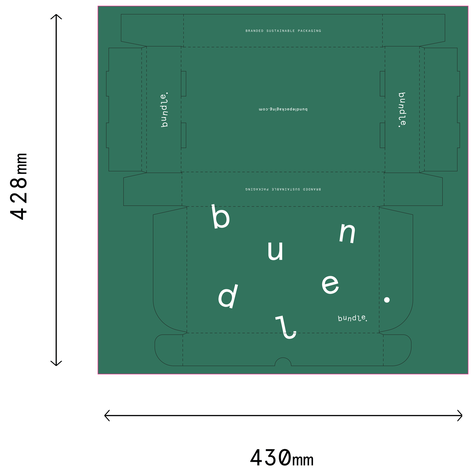
Safe Area
Our boxes are printed as flat sheets before being cut, so you can bleed artwork off the edges. The template shows all the crease and fold lines so you can tailor your design accordingly.

10mm Bleed
Our recommended net bleed size is 10mm from the cut lines.

High-Res Images
Please ensure all images are CMYK and 300dpi.

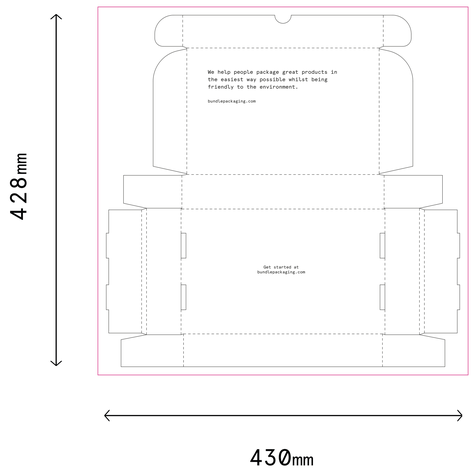
Export to PDF
Export your design as Adobe PDF/X-1a2001 standard.

Finished size: W 232mm x H 150mm x D 40mm



Outer

PLEASE NOTE: Our uncoated boards absorb more ink and give a matt finish. Coated boards allow the ink to sit on the surface and appear brighter. If in doubt as to these effects, please contact our sales team.



Inner (optional)

PLEASE NOTE: All corrugated board has a higher quality surface on the outside. The inner layer will not print to the same levels as the outer, we suggest keeping this to single colours and simple text.

bundle.
